## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Grabbe (US 5,173,055).

Grabbe discloses at least one receiving zone 10 in the middle of Fig. 1, a plurality of island-defining portions (10 outside of 10 in the middle of Fig. 1), a serpentine member (area between 10) and 10 are formed by forming recesses.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grabbe (US 5,173,055) in view of P. R. Theobald et al (US 3,723,176).

Grabbe discloses electrical contacts (tip of 18s) and an electrical terminal (16).

Grabbe fails to disclose depositing a metal layer to form a circuitry layer.

Theobald discloses depositing a metal layer to form a circuitry layer (50).

Art Unit: 3729

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Grabbe by depositing a metal layer to form a circuitry layer, as taught by Theobald, for the purpose of preventing corrosion and increasing electrical conductivity.

5. Claims 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grabbe (US 5,173,055) in view of Fukutomi et al (US 6,568,073).

Grabbe fails to disclose etching the metal.

Fukutomi discloses etching the metal (Abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Grabbe by etching the metal, as taught by Fukutomi, for the purpose of providing burr-free surfaces.

#### ***Allowable Subject Matter***

6. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

7. Applicant's arguments filed 11/18/03 have been fully considered but they are not persuasive.

Examiner thanks the applicant for complying with Paragraph No. 11 in the last Office Action. This greatly helps with understanding the applicant's invention. Furthermore, Examiner thanks the applicant for catching a minor typo error.

Since Grabbe teaches all the steps as recited in claims 1 and 8, it must an integrated circuit carrier.

A recitation of the intended use of the claimed invention “for receiving an integrated circuit” must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Fig. 1 shows around each receiving zone 10 there are six serpentine members.

#### *Interviews After Final*

8. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

#### *Conclusion*

9. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity. Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as

Art Unit: 3729

**originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.**

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
